

Nucleosynthesis and Evolution of Neutron Stars

Contribution ID: 38

Type: **Invited talk**

Pre-supernova stellar structure and hydrodynamics leading to the formation of neutron star

Monday, January 27, 2025 1:30 PM (40 minutes)

It depends on the allocated time for the talk, but generally I plan to review recent developments in 3D neutrino / hydrodynamics simulations related to questions of minimum neutron star mass / fall back supernova / neutron star birth spin etc.
